

## **Preface**

This collection of papers was presented at International Conference on Leadership and Management 2018 (ICLM 2018) which was organized by the Department of Management and Humanities, Universiti Teknologi PETRONAS with a theme “Redefining Leadership in Managing Industrial Revolution”. The conference was the part of the Engineering, Science and Technology Congress (ESTCON) 2018 which was held from 13th – 14th August 2018 at Kuala Lumpur Convention Centre, Malaysia

The conference aim was to provide academics, researchers, practitioners, and students a forum for sharing research and best practices within and across two predominantly significant spheres of the corporate world, namely leadership, and management. A key objective was to bring together these various groups in a scholarly engagement, for the pursuit of collaborative discourse and expanding the notions of leadership and management. The conference has brought together original scholarly contributions in the form of papers which raise questions related to the following themes:

- Agile Leadership
- Preemptive Global Business Management
- Digital Economy
- Millennial HR Management
- Ethics and Governance in the Digital Age
- Digital Communication

The ICLM 2018 committee acknowledge the enormous support of the Universiti Teknologi PETRONAS, Malaysia to make this collection possible. We also acknowledge the support of the reviewers from Malaysia, Australia, United Kingdom, Pakistan, and Oman whose timely and critical feedback helped the authors in improving the work.

It is hoped that the collection of these papers on emerging themes will be of interest to the readers and will trigger further research work that continues to confront issues in Leadership and Management.

Assoc. Prof. Dr. Zulkipli Ghazali

Editor-in-Chief

International Conference on Leadership and Management (ICLM2018)
