

PREFACE

The International Scientific Conference “Philosophy: traditions and innovations” (APPSCONF-2019) is held from 25 to 27 November 2019 on the basis of Don State Technical University, Rostov-on-Don. APPSCONF-2019 will be held in a separate conference format for the first time.

The work of the conference is aimed at providing an opportunity for scientists, graduate students and representatives of the construction industry to generalise the recent achievements results in the field of industrial and civil construction (design, organisation of all types of work, construction materials, etc.), discussing promising directions for the construction industry development and establishing useful partner relationships for future interaction.

The conference is held on numerous topics:

1. Philosophy of science and technology
2. Philosophy and world religions
3. Man in the world of culture
4. Descriptors of philosophical epistemology

288 participants from 21 regions of the Russian Federation and 11 participants from 7 countries of the near and far abroad (Abkhazia, Armenia, Iraq, Kazakhstan, Lebanon, Ukraine, China,) were registered for the conference in 2019.

The absolutization of scientific rationality is questioned and subjected to various kinds of criticism, which leads to the actualization of Modern humanitarian thought and the activation of socio-cultural analysis of the origins and essence of scientific knowledge. Scientists also began to recognize the need to go beyond narrow disciplinary approaches and search for ideological justification of scientific research. In modern epistemology, the emphasis has shifted to the consideration of irrational forms of knowledge and their essence. The conference is intended to provide an opportunity for scientists, graduate students to summarize the results of the latest achievements in philosophy and theology, as well as to discuss promising areas of development of the industry and establish useful links between partners for further cooperation.
