Analysis of the information for positioning of companies with operations in Sofia and the 24 districts of the capital municipality

Maria Popova-Hristova1∗

1Sofia Investment Agency, Sofia, Bulgaria

Abstract. This study is the first step of an initiative of the Invest Sofia for Mapping the Industry in Sofia. As an agency whose main function is to attract investments in the city, we need information about where in the city what industry is developing, what are the prerequisites for the development of the ecosystem, how many are employed in the sector, what revenues are realized in a certain area. These are data that we could provide to potential investors and assist them in choosing the most suitable for their business location and for realizing their investment intention in the city. Thanks to the data from the survey, we will be able to put in strategic documents for the city necessary follow-up in order to further develop the region in one direction.

1 Introduction

This publication is part of a study ‘Map of Industries: Head Offices in Sofia by Regions’ which includes an analysis of 116 companies operating in Sofia and their offices in the 24 districts of Sofia Municipality. In the survey, the companies are distributed by type of industry and by the size of the annual turnover of the enterprise and allows potential investors to follow the city’s development by regions.

In the study ‘Map of Industries: Head Offices in Sofia by Regions’ are included companies with annual revenue of up to EUR 50 million (93 companies), up to EUR 100 million, up to EUR 250 million, and with over EUR 250 million annual turnovers. The data are from 2019 [1].

2 Materials and methods

The purpose of the study is to establish the sectors of activity, as well as the appointed employees of companies with annual revenue over BGN 20 million, which will orient the potential investors for the development trends in the different regions of Sofia allows potential investors to follow the city’s development by regions.

From the results obtained we get an idea of the distribution of the annual revenues of the business in Sofia. The leading sectors by region are emerging concretely and clearly. The creation of a digital map of the industry in the city will give us an idea of the distribution by type of business activity, revenue, workforce, as well as trends for the development of the regions. Such a function and task are assigned to Sofia investment agency. The role of the Agency on the one hand is to attract potential investors and, on the other hand, to existing and operating ones in the territory of the city. The provision of data, statistics, and detailed information on the gross domestic product, human resources, and other economic indicators is part of the daily life of the Agency's team. Once collected in one place in a digital format and properly maintained systematically, this information will contribute to the optimization of human resources, time, and money.

Interesting and useful information that would influence an investor to realize their investor intention in the city is the future investments that the current companies plan to make. This data should also be added to the industry map after the business survey to provide an insight into the ecosystem and the upcoming changes in the city. Being a municipal structure, the Agency has municipal investment intentions.

5 Conclusion

The sectors that have realized the most revenues in the regions of Sofia are IT – ICT; Food industry and Outsourcing.

The regions with leading indicators in terms of realized revenues attracted companies with annual revenue for 2019 over BGN 20 million and number of employees are Mladost, Triaditsa, Lozenets, Vitosha, and Iskar.
