

## **Statement on geographical naming conventions**

At *Web of Conferences*, we are committed to serving the global academic community by facilitating the open and respectful exchange of scientific knowledge. As part of this commitment, we maintain a strict policy of neutrality with regard to geopolitical and territorial issues.

Conference organisers, editors, and authors are responsible for the content they provide, including the naming of conference locations and institutional affiliations. We do not impose geographical naming conventions or political interpretations, in line with our principle of non-interference in matters that fall outside the scope of scientific discourse.

We see our role as supporting the dissemination of research without political influence or judgement, in a manner that respects the diversity of our international contributors.
