
Guidelines for conference organizers providing camera-ready PDF articles

Please indicate clearly to your authors

- The format of the articles (17 x 25 cm 1-column, or A4 2-columns, depending of your choice). We recommend to **use the same format and template for your entire volume**.
- They are welcome to use the *Web of Conferences* **Microsoft Word or LaTeX2e templates** to prepare their articles.
- The type of files the authors must supply: **camera-ready PDF** – They must follow carefully the “[Camera-ready file preparation](#)” guideline available on the journal website.

Extra care should be paid to the names of authors and the list of references. References will be linked to their original source, via *CrossRef*, only if they are correctly presented. The given-name (or first name) must be written in *ITALIC*. If you make mistake there, authors may not be properly indexed. A complete affiliation must be mentioned [Department, Institution, City, and Country]

Example to follow:

*Manohar Gangikunta*¹ and *Sonnati Venkateshwarlu*²

¹ Associate Professor, EEE Department, CVR College of Engineering, Hyderabad, India

² Professor, EEE Department, CVR College of Engineering, Hyderabad, India

-  Important WARNING!

Be careful, no extra corrections will be made by the publisher after publication!
Authors must carefully check their article, including authors' names, initials, authors' affiliations, references, which are the most common mistakes.

1) What the organizers need to supply to EDP Sciences

- A **camera-ready PDF** for each article/contribution;
- A **Publication Right form** signed by at least one author(s) for each article;
- The **Statement of Peer Review** completed and **signed** by the editors of the proceedings;
- The **table of contents** (see instructions below);
- A **document** with:
 - ✓ the title of the conference
 - ✓ date and place of the conference
 - ✓ the names of the scientific/guest editor(s)
- An **image** (free of rights), which represents/illustrates the conference ex: poster of the event, logo...;
- [For printed proceedings only, a text of presentation of the conference (10-20 lines) for the back cover of the book.]

Remember that:

- Fonts must be embedded in all PDF files
- The quality of the digital images should be at least 300 dpi for figures that will be published in a paper version and at least 150 dpi if it's only an online version
- Warning! NO correction will be made by the publisher once the material is in production (except if you have chosen the checking PDF option).
- The Preface will be considered as a full article (indexed + DOI number). Therefore, it will be included in the total number of articles published.

2) The table of contents

First, you do have to decide the sequence in which the papers should appear in the proceedings. If the papers should be arranged under some topic headings within the table of contents, please make sure that these headings are included in the table of contents supplied to us.

In the table of contents, for each contribution, we need to know the **title of the paper**, the list of **all author names**, and the **number of the articles**. The articles numbers should contain 5-figure numbers XXYYY.

XX corresponds to the topic heading number:

00 = no topic heading or paper outside topic headings

01 = first topic heading

02 = second topic heading

YYY corresponds to the sequence of the paper in the topic heading.

Please include in the table of contents all the editorial material. Please see below one example of a well-done table of contents.

Contents	
00001	Preface
00002	Opening address
Dense matter	
01001	Thermal-statistical model <i>J. Cleymans and F. Gelis</i>
01002	Color Glass Condensate and initial stages of heavy-ion collisions <i>J. Cleymans, F. Gelis and T. Hallman</i>
01003	Effective Field Theories for Hot and Dense Matter Color <i>D.E. Blaschke, J. Cleymans, F. Gelis and T. Hallman</i>
Heavy-Ion Collisions	
02001	Results and Perspectives of RHIC experiments <i>T. Hallman</i>
02002	Heavy-ion collisions at LHC: The Alice Experiment <i>A. Marin</i>

3) Preparing files

PDF files should be named according to the table of contents sequence:

<short-form conference title>_<table of contents sequence>

Examples for the conference DM2008:

Dense matter

dm2008_01001.pdf

dm2008_01002.pdf

dm2008_01003.pdf

Heavy-Ion Collisions

dm2008_02001.pdf

dm2008_02002.pdf

4) Getting the files to EDP Sciences

We need to receive all the electronic files (including all the papers, the Statement of Peer-Review, any editorial material, the table of contents, all license agreements) **in a single batch** before production can start. To avoid files handling errors, it is not allowed to send the material of your conference in several times.

Please upload via FTP as a single compressed file the complete set:

- Prepare and name all files in accordance with previous sections,
- Combine all the files into a single archive using tar/gzip and name your archive as follow: **short-form conference title>.tar.gz** (Ex: for DM2008 → **DM2008.tar.gz**),
- Log on to Protocol = SFTP (SSH File Transfer Protocol)
 - Host = **sftp://sftp.edpsciences.org**
 - Port = **2222**
 - Login = **colloques**
 - Password = **Please ask the Production Office (isabelle.houlbert@edpsciences.org) to provide you with a PASSWORD to connect**
 - Directory to upload files = **to EDP**
- Upload your single compressed file,
- Please send an e-mail to isabelle.houlbert@edpsciences.org to confirm that the file has been uploaded, otherwise, your conference might be considerably delayed.

Should you encounter any problem using our FTP site, you can use another way, like "**WeTransfer**", and send the production team the link where to download your material.

5) Publication

Your conference will be appointed a **volume number** only when the materiel is complete.

You will be informed by email when your conference is going to be published online. At this stage, you will receive a **final publishing agreement for signature**. The invoice will be prepared and sent right after receiving the signed document.

It is at the discretion of the indexing databases as to how quickly they process and upload new content. Unfortunately, **we have no control over how long it takes for each volume to be indexed**. It can often take some time for papers to appear. There is no need to contact us for this purpose as we can't speed up the procedure.

Reuse data: Conference papers may be updated, or enhanced, for further publication as a regular journal article, including submission to journals not published by EDP Sciences. Journal articles derived from work previously published in conference proceedings must contain a substantial amount of new or previously unpublished results.

Articles published in Web of Conferences can be uploaded on repository sites (like *arXiv*) provided the authors cite the source or, if not published yet, they add a note stating that the article is under consideration with Web of Conferences.

Contact:

If you require further assistance about the production process, please send an e-mail to isabelle.houlbert@edpsciences.org

If you want to have general information about Web of Conferences, please send an email to: Solange.guehot@edpsciences.org

Thank you for your cooperation!
